 Subject: Re: Fw: 2011/0312 - The Elms, Abbey Road, Ulceby

Having just been notified of this application, and subject to Ian Goldthorpe's approval, my comments are as follows;

The entire area outlined in red on the Block & Location Plan is covered by a Tree Preservation Order, specifically Area 2 of the Ulceby 1984 Order. Therefore all trees present at the time the order was made are protected.

This application indicates the need to remove a number of trees and has failed to demonstrate that the development would not adversely affect trees or that the Council's SPG on trees has been considered in relation to the trees on the site and adjacent to the site. If the planning authority is required to determine the application in its present form, the application should be **REFUSED** as it is contrary to policy LC12 and SPG11 of the North Lincolnshire Local Plan.

For any future proposal it would be advisable for the applicant to retain the services of an arboricultural consultant, qualified and experienced in dealing with trees on development sites, to ensure those issues which might affect trees are identified and addressed. *BS 5837:2005 Trees in relation to construction - Recommendations*, sets out the information required. The councils SPG11 also provides guidance on trees and development.

In the first instance a Tree Survey, independent of and prior to any specific design for development, should record information about the trees on site which are suitable for retention or removal. This should be followed by an Arboricultural Implications Assessment to evaluate and possibly mitigate the extent of direct and indirect impacts resulting from the implementation of any site layout proposal. Finally a Tree Protection Plan and Arboricultural Method Statement should show the finalised layout proposals and methodology for implementing the development where there is potential for loss of or damage to trees.

Where any application results in the loss of trees, there will normally be a requirement to see suitable replacements incorporated within a landscaping proposal.

Should the applicant wish to, the Tree Officer is available to discuss this further.

Colin

I am not sure if all of you have been consulted on the above application, but with the exception of Colin, you all made comments on the previous application - 2010/0785. Nothing has really changed so if your previous comments still stand please let me know. I am hoping to get the app to next committee and my deadline is tomorrow so any comments before then - or as soon as possible after would be appreciated.
Thanks
