Subject: 2011/0673 Planning permission to erect a new Primary School, proposed School Lakeside Parkway Scunthorpe

Regarding the above application, having looked at the tree report submitted, it is noted that there is no indication within it as to the location of the trees reported upon. A diagram of location of these trees on the site, is therefore required as soon as possible to enable accurate information on where on the site these trees are, and how close to the proposed buildings etc. Also further information as the positioning of protection zones around these trees, is also required - also in the form of a map diagram.

this further information is required and it would be appreciated if I could be contacted once this information is available so that full and complete comments can be made in regard to this application.

regards

Andrea Brocklebank
Environment Officer (Trees and Landscape)
