Application reference: PA/SCR/2018/14

Do you.....: Object to proposal

Comments: The South Killingholme Parish Council met on Monday 3rd September and unanimously voted against the proposal. They are concerned to further industrialisation surrounding the village. What impact studies have there been on the light, noise and air pollution along the A160? How will the fumes add to the present levels? How will it impact the school children and local residents? Councillors are aware from personal experience of how the vehicles entering the docks or exiting the docks do so in streams and block the roundabout to free flowing access of the A160 between Immingham and South Killingholme. What is your management plan? Who will be responsible for the extra wear and tear on the A160? How will it affect the local neighbourhood plan? With access required at traffic lights for the refineries what figures will there be on extra use and congestion? Will there be any benefits to employment in South Killingholme?
