

## Timber Sash Windows

[CONTACT US](#)

Hand-made in our factory in Cheshire.

We have been manufacturing timber sash windows throughout our history, and have for a long time been known as 'The Home of Sash Windows'. We use a wide variety of different timbers, resulting in over 10 variations in our collection, including bespoke designs and the ability to match with existing. We have 'slimline' versions of our windows which still incorporate double glazed units (filled with Krypton gas) and are the slimmest on the market, replicating single glazed windows of the past. These have been used for conservation work in many areas of the country.

Many of our timber sash windows have been certified with the British Standards Institute for Window Energy
