

Reasons For Works – 20 Pasture Road South.

As you can see, the tree is bowing and encroaching into neighbouring gardens. The sheer size of the tree is making it difficult to maintain our garden. We need to be able to maintain our tree to keep it healthy. In addition to this:

- During autumn/winter months, high winds mean there is an excess of dead branches in our and neighbouring gardens which could prove quite dangerous.
- It is blocking out the sun, making it difficult to maintain our lawn.

We have no idea when the time the tree was maintained. We bought the house in July 2021 and the previous owner had no idea when this was last conducted. With this in mind, we feel it be appropriate that planning permission be granted.
