

FW: PA/2025/907

Subject: PA/2025/907

Good afternoon,

Thank you for consulting with Highways on the above application.

Having looked at the submitted information, the proposed sign is situated approximately 150m from the signalised junction at Dudley Road/Queensway and 170m from the signalised crossing on Queensway and therefore is unlikely to cause an issue with either of these. It will be static display with the displays changing every 10 seconds, which appears to be standard practice and is designed to minimise visual distraction. The luminance will be in accordance with national guidelines. Both of these can be secured via condition.

Kind regards
