Hi Scott,
Sorry for the delay in responding we have been moving house and office....always fun!!.....

Re your email....i dont think the applicant had envisaged total closure and full reinstatement plans at the 10 year point ...more for the quarry to go dormant again as it has been to date i.e. as the quarry is a company asset and may well be used again at some point in the future to extract small amounts of material again or be sold on as a small quarry....

RE material excavation depths.....for the Grasby Project this would be minimal, in the region of only 0.5M excavation down to the current exposed chalk area which is minimal....this could also be achieved by 1M excavation down to only half of the current exposed chalk area say the Southern end.....

I hope this clarifies

Kind Regards

Keir

Hi Keir,

I'm just emailing in respect of the above application. More specifically I'm emailing in relation to the area which is proposed to recommence mineral extraction for chalk and limestone in connection with the project at the former Grasby Quarry site. The reason for emailing is that it is proposed the extraction will have a projected lifespan of 5-10 years and so I was wondering whether you had any additional information to provide in relation to the depth of excavation proposed at this site and whether any plans have been put forward for the restoration of the site once it has ceased operation. The reason for this is if no plans have been put forward then I am considering a condition for the restoration of the site in that regard. Can you please let me know your observations on these points.

Kind Regards

Hi Keir,

Good morning and a happy new year to you. Thanks for agreeing the EOT on this one. I know it keeps slipping with the decision date on this one but I haven't had any updated response from Ecology on this one, so I will chase it today, and then update you in turn when I hear back. Therefore can we please agree to an extension of time to the end of this month to provide sufficient time for this response to be received and for the application to be determined; with that in mind can you please agree to an extension of time to the determination date for this application until 30 January 2026 by replying to this email.

Kind Regards

Hi Scott,
Yes EOT agreed till 09.01.26.....have you got any news / update from ecology?.....
Kind Regards,
Keir

Keir,

Good morning, I hope you are well. I'm emailing in respect of the above application. By way of update I have not received an updated consultation response from Ecology as they have had to prioritise some other work in relation to the local plan and so I will try and chase an update. With that in mind and given the amount of work I have to try and complete before the Christmas break it is highly unlikely I will be able to put the application through for a decision by the initially agreed date, therefore could you please agree to an extension of time to the determination date until after the new year (9/1/26) by replying to this email.

Kind Regards

Hi Keir,

Thanks for your email. In response I can confirm I haven't received an updated response from Ecology as of yet, they were reconsulted on 13/11/25 for a period of 14 days so it will be up to another week before their comments are anticipated. So with that in mind could we please agree to an extension of time to the determination date for this planning application (taking into account my current workloads) until a month today (20/12/25) by replying to this email.

Kind Regards

Hi Scott,

How are you?...

Hows this application going?....is the LPA ecologist happy with the revised BNG and Proposed Block Plan?...

Kind Regards,

Keir
