

Clarification provided by NLC in respect of whether a one way system for Winterton has been considered.

Rob

Not that I am aware of

We tend to discourage one way streets as speeds will increase as there is no oncoming traffic and the roads are wide enough to accommodate 2 way traffic. A one way system would require a TRO and consultation would be difficult as residents would have to travel a longer distance and if you live at one end as your inconvenienced by having to travel a longer distance than the direct route. Traffic flows may also increase.

There are some one way streets in Winterton , including Churchside and Ross Lane but these are relatively short and narrow

Hope this helps, let me know if you need anymore

Ian

Have we ever considered a one-way system for the road network in Winerton?

Rob
