

North Lincolnshire Local Plan

Heritage and Archaeology Impact Assessment: Methodology and Assessment of Sites

October 2020

Site Selection and Heritage Impact Assessments

1. Introduction

The Local Plan sets out a clear vision and objectives for the future development of the area, addressing needs and opportunities in relation to housing, the economy, community facilities and infrastructure. It will also be a basis for safeguarding the environment, adapting to climate change and securing good design. Its policies and proposals will be used to guide decisions and investment on development and regeneration up to 2038. The purpose of this Heritage Impact Assessment is to support the Local Plan by demonstrating how the historic environment has been considered in the site selection process and to assess the likely impact on heritage assets, both designated and undesignated; and whether or how, any harm can be mitigated.

Housing, employment and minerals options have been assessed by North Lincolnshire Heritage Officer and Conservation officer in accordance with Historic England's best practice guidance. The assessment identifies the significance of any heritage assets affected by the allocation, assesses whether allocation might lead to potential harm (or benefit) to this heritage significance, and how any harm could be reduced or mitigated. It also looks at any potential archaeological constraints on the allocation of the proposal sites. The assessment establishes the known or expected archaeological potential and potential historic landscape significance of the sites proposed for allocation for future development.

2. North Lincolnshire and its Heritage Assets

North Lincolnshire has a rich and distinctive natural and historic environment that is valued and enjoyed by those who live here. This needs to be understood and taken fully into account as developments are being planned, designed and implemented. National policy set out in the NPPF and associated guidance outlines core principles in respect of the natural and historic environment for those that reside and invest here. The condition of the surrounding natural and historic environment, including many heritage assets, are critical to North Lincolnshire's image, having a significant impact on the quality of life as well as bringing both social and economic benefits to its communities.

Within North Lincolnshire there are currently (January 2019): 39 Grade I Listed Buildings; 36 Grade II* Listed Buildings; and 837 Grade II Listed Buildings, together with 17 Conservation Areas. There are also 46 Scheduled Monuments. The Conservation Area Appraisals also include a number of buildings, whilst not listed on the National Heritage List, are considered important local buildings of townscape merit. A large area of the Isle of Axholme is designated as historic landscape of special interest for its ancient open strip field character and turbaries (peat reserve). There is also a sliver of land within North Lincolnshire that is a part of the Registered Park at Brocklesby (the only one in relation to North Lincolnshire). There are several thousand non-designated heritage assets recorded on the North Lincolnshire Historic Environment Record such as archaeological sites, historic buildings and landscapes.

3. National Planning Policy and Legislation

The rich historic landscape within the area is described above and there is therefore the likelihood of known and potential heritage assets being affected by the sites proposed for development. Inevitably, there will be sites proposed for allocation where there is potential for conflict between development and the conservation of heritage assets and archaeology.

Any decisions by a local authority relating to listed buildings and their settings, conservation areas and scheduled monuments, and non-designated heritage assets, including allocation decisions, must address the statutory considerations and satisfy the relevant policies of the National Planning Policy Framework (NPPF).

The statutory duties stem from the Planning (Listed Buildings and Conservation Areas) Act 1990 and include special regard to the desirability of preserving a listed building or its setting or any features of special architectural or historic interest which it possesses. For conservation area a local planning authority must pay special attention to the desirability of preserving or enhancing the character or appearance of that area.

National planning policy, set out in the NPPF (Paragraph 185) states that local planning authorities in their plans should set out a positive strategy for the conservation and enjoyment of the historic environment including heritage assets most at risk through neglect, decay or other threats.

The NPPF requires that planning authorities deliver sustainable development by ensuring that policies and decisions concerning the historic environment;

- recognise that heritage assets are a non-renewable resource;
- ensure decisions are based on the nature, extent and level of significance of the affected heritage asset(s);
- ensure the historic environment is integrated into planning policies, promoting place-shaping and local distinctiveness.

Planning policy guidance published to support the NPPF and planning system advises that significance should be identified at an early stage using evidence and expertise and advises identifying areas of potential non-designated heritage assets with archaeological interest.

4. Historic England Guidance

Historic England advice on the initial site selection methodology was that in order to demonstrate that the sites that the local planning authority is putting forward as allocations are compatible with the requirements of the NPPF (and, where relevant, the Duties under the 1990 Act) there needed to be an assessment of the likely effect that the development of these sites might have upon the historic environment. Historic England suggested that the Council undertake a Heritage Impact Assessment of all the sites which are identified as being likely to affect North Lincolnshire's heritage assets.

Such an assessment would need to evaluate:-

- The contribution the site makes to the significance of any designated heritage assets in its vicinity.
- What impact the development of the site might have upon the elements which contribute to their significance
- If it is likely to result in harm, what measures will be necessary to remove or reduce that harm
- If, despite the mitigation measures, the development is still likely to harm the significance of a heritage asset, what public benefits does the site provide that outweigh the harm. If there are none, or the level of harm is not outweighed by the public benefits, then the site should not be allocated.
- If there is potential for an allocation to enhance or better reveal the significance of a heritage asset.

Historic England's Guidance "The Historic Environment and Site Allocations in Local Plans" (October 2015) outlines an approach to this which is the approach followed in this impact assessment.

5. Purpose and scope of the Heritage Impact Assessment

An appraisal of sites in relation to the impact on Heritage assets was also carried out through the Call for sites process.

Through the Local Plan process several stages of Call for sites were carried out. All sites which were assessed through the Strategic Housing and Economic Land Availability Assessment (SHELAA) which is a key evidence base for the Local Plan. Through this process all the sites were assessed by the Historic Environment Officer. The criteria used was:-

Historic Environment

Red- Development of the site would cause substantial harm to a designated or non-designated heritage asset or their setting, which cannot be reasonably mitigated.

Amber -Development of the site could have a detrimental impact on a designated or non-designated heritage asset or their setting, but the impact could be reasonably mitigated.

Green -Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets or their settings.

Heritage Assets are buildings, monuments, sites, landscapes and places identified as having a degree of significance meriting consideration in planning decisions because of their heritage interest.

Designated heritage assets include:

- Listed Buildings (grade I, grade II* and grade II)
- Registered Parks and Gardens
- Scheduled Ancient Monuments
- Conservation Areas

Non-designated Heritage Assets can include locally listed buildings, non-registered parks or gardens, historic landscapes, sites with known and potential archaeological evidence and sites identified as having local heritage significance, recorded in the North Lincolnshire Historic Environment Record (HER).

Historic England and North Lincolnshire's historic environment Officers will be consulted on sites to test their suitability against impacts on the historic environment. The in-house assessment will be based on an appraisal of the current records, including GIS data, held within the North Lincolnshire Historic Environment Record, and professional expertise. NB. this is not a substitute for detailed heritage assessment which may be undertaken at any stage and may alter the assessment of site suitability in relation to designated and non-designated heritage assets and their settings.

Exceptions: None

This Heritage Impact Assessment pulls together this information and shows how the significance of any heritage assets affected by potential allocation has been considered in the site selection process and the likely impact this would have on heritage assets, and whether any harm can be mitigated. In doing so it is intended to be both a positive strategy and significance led as required by the NPPF and recommended in Historic England guidance.

The following types of assets have been considered in this assessment:

- Designated assets including statutorily listed buildings, scheduled monuments, nationally designated historic parks and gardens, and conservation areas.
- Non-designated assets such as archaeological sites, parks and gardens of local historic interest and any buildings of local interest that may be revealed during the process.

The heritage assessment of site allocations was undertaken by the council's Heritage officer.

All housing and employment sites and the small number of mineral sites that are being considered for allocation in the Local Plan have been assessed. The assessment score for all sites is summarised in the tables below.

The assessment is used to highlight heritage considerations in the next stage of decision making and indicate how any impacts can be mitigated. It also seeks to identify opportunities through site allocation for finding viable uses for heritage assets or whether there are other public benefits which might outweigh any harm to significance.

6. Methodology

The methodology for the heritage impact assessment of the sites is a significance based approach which closely follows the 5 steps outlined in advice note 3 "The Historic Environment and Site Allocations in Local Plans" site selection methodology".

These are summarised as follows;

Step 1: Identify which heritage assets are affected by the potential call for sites and site allocations.

Step 2: Understand what contribution the site (in its current form) makes to the significance of the heritage asset(s)

Step 3: Identify what impact the allocation might have on that significance,

Step 4: Consider maximising enhancements and avoiding harm

Step 5: Determine whether the proposed site is appropriate in light of the NPPF's tests of soundness

A pro-forma was produced for each site to record the information and assessment of each step above (Appendix 1). All sites were also assessed through the Strategic Housing and Employment Land Availability Assessment. The assessment was completed by focusing on the questions related to each step on the pro-forma. The summary tables include all sites put forward up to the time of writing.

Step 1: Identifying Heritage Assets affected.

Any designated and non designated heritage assets within the site boundary were identified through GIS mapping layers. Using the data sources referred to above and local knowledge additional heritage assets outside the site whose setting could be affected or any undesignated heritage assets affected were identified at this stage. In addition, any of these heritage assets that are 'at risk' or 'vulnerable' are highlighted where relevant at this stage.

On many sites no heritage assets were affected and in these cases the assessment proceeded directly to stage 5.

This assessment involved a traffic light system and written summary balancing the degree of harm against constraints and opportunities (and consistent with legislative requirements).

The final assessments summarised in Table 1 were then submitted to inform the next stage of site selection in the Local Plan .

Step 2: Contribution of the site to the significance of the heritage assets.

Understanding significance is essential in order to be able to assess the potential impact of any development. The Historic England document “Conservation Principles: Policies and Guidance for the Sustainable Management of the Historic Environment” (2008) provides a useful basis for articulating significance which is based on how a heritage asset or place is valued by this and future generations because of its heritage interest.

This may derive from an asset’s:

- Evidential value: potential to yield evidence about past human activity
- Historical value: connection with a notable person or event
- Aesthetic value: design and appearance
- Communal value: connection with any current or past community

Some of the allocations raised issues of setting rather than direct impact. The assessment of contribution considered the relationship of the site to the heritage asset and in particular the contribution of setting and contribution of any open space to the character (especially at the edges) of Conservation Areas. This was assessed in accordance with Historic England advice contained in ‘The Setting of Heritage Assets Historic Environment Good Practice Advice in Planning: 3’

The allocations guidance suggests that understanding significance should be ‘in a proportionate manner’. It suggests that the more complex heritage assets may require a more detailed study at this stage and that any additional information that is essential to assessing significance (eg due the complexity of the site or nature of the heritage asset) should be sought at this stage

Where, in a number of assessments, the site made very little or no contribution to the significance of any heritage asset the assessment proceeded directly to stage 5.

Step 3: Likely impact of allocation on heritage significance.

This stage required making an assessment of how the extent, location, siting, form, appearance, or other impacts might affect the significance of the heritage asset including its setting.

At this point the likely degree of harm to significance (in so far as this was possible without scheme details) was assessed. The likely harm was given weight according to the value of the asset; i.e. in line with the NPPF: No harm/some harm/substantial harm).

Step 4: Heritage Constraints and Opportunities:

Any means of avoiding harm was identified as part of this step; for example, where harm could be minimised through constraints on the site boundary, the location, density, height, form, materials, or through retaining key views depending on the nature and significance of the affected heritage asset.

This stage was also used to identify opportunities for enhancement or to better reveal significance; for example, enhancement could come through opportunities for improvements to consolidate historic character and street scene or there might be an opportunity to bring into sustainable use a heritage asset at risk. Other opportunities included possibilities of improving interpretation or increased public access (to better enjoy the heritage asset).

If there is some harm to the heritage asset(s) likely as a result of the site's development it was particularly important that means to avoid harm or opportunities for enhancement to offset harm were identified in the assessment in order to make a balanced judgement in the next step.

Step 5: Recommendation:

The assessment concludes with a judgement on the suitability of site for allocation as follows;

Red - Development of the site would cause substantial harm to a designated or non-designated heritage asset or their setting, which cannot be reasonably mitigated.

Amber- Development of the site could have a detrimental impact on a designated or non-designated

Green - Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets or their settings.

The final assessment involved a written summary balancing the degree of harm against constraints and opportunities (and consistent with legislative requirements).

Tables: Heritage Impact Assessment of Call for sites

Below are summary tables of the potential impact on above ground heritage assets of the submitted sites with the assessment score. The individual assessments leading to the recommendation have been organised into three groups. The first group of sites (green sites) are those where there is 'no heritage impact' either because there are no heritage assets within or near the site or, if there are, their heritage significance would not be affected due to the nature of the asset. The second group (amber sites) are those that would likely be affected in some way and the potential impact, whether positive or negative, is considered in more detail. The third group any sites which scored red were discounted and not deemed suitable for housing development due to the significant impacts on the Heritage Assets. Where there is potential impact (amber) the map in each assessment indicate the proximity and type of heritage asset affected.

Table 1 Call for sites submitted in 2017 Summary Table – Sites scored Green Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets or their settings.

Site Address	Site Ref	Settlement	Score
Land at Hewson Street	19H34	Messingham	Green
Pond Farm, Kelfield	EHBDW	Kelfield	Green
Brook lane	BV843	Scawby Brook	Green
Lancaster view, Top Road, DN40 3JU	COMRD	North Killingholme	Green

Land east of Brocklesby Road	OLANV	Ulceby	Amber	Allocation requires HIA: Archaeological field evaluation comprising earthwork, geophysical survey and trial trenching
Land to the west of B1206, Wrawby, DN20 8SH	XJDJZ	Wrawby	Amber	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching
Land to the rear of Olcote House, King Edward Street, Belton	ZAROK	Belton	Amber	Allocation requires HIA: LC14 setting Assessment

Land at south of M180 Junction 5 "Barnetby Interchange" Barnetby DN38 6DW	K052F	Barnetby	Amber	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching
Land off High Levels Bank, Belton, Scunthorpe, DN17 BP	4LG95	Scunthorpe	Amber	Allocation for any of three proposed uses requires HIA: LC14, LB Assessment; Archaeological field evaluation comprising geophysical survey and trial trenching
Land at Millfields Way	EFJE7	Barrow upon Humber	Amber	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching
Field off Church Lane	OJUTW	Haxey	Amber	Allocation requires HIA: Archaeological Assessment that may include field evaluation
Between Ferriby Road, A15, Westfield Road and Gravel Pit Lane	MXLQZ		Amber	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching
Land at King`s Road Land	X46AD	Barnetby le Wold	Amber	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching (underway)

Table 6 Call for sites submitted in 2018 Summary Table Sites scored Red - Development of the site would cause substantial harm to a designated or non-designated heritage asset or their setting, which cannot be reasonably mitigated.

Site Address	Site Ref	Settlement	Score	HER Comments
119 Westgate Road Belton DN9 1PY	JGX3B	Westgate	Red/Amber	The northern part of this site may have potential for some development but must not damage character of adjacent LC14 - EEL/AOSF, or archaeology
Land North East of Park View Terrace West Butterwick	L574P	West Butterwick	Red/Amber; Parts of this site may have potential for development of community facilities but must not damage character of adjacent AOSF	Allocation requires HIA: LC14 Assessment
The site is known as Staniwells Farm, adjacent to the A15 to the east and the B1398 to the west, North Lincolnshire	PHCHB		Red/Amber; Parts of this site may have potential for development but must not damage SM or its setting or any	Allocation excluding SM requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching (NB full extent of nationally important archaeology not yet defined beyond scheduled area)

			significant archaeology	
Land at Staniwells Farm, to west of Hibaldstow (Adjacent to A15 and B1398)	AUSKO	Hibaldstow	Red/Amber; Parts of this site may have potential for development but must not damage SM or its setting or any significant archaeology	Allocation excluding SM requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching (NB full extent of nationally important archaeology not yet defined beyond scheduled area)
Land to the south west of West Street West Butterwick	HWHDW	West Butterwick	Red/Amber; Parts of this site may have potential for development but must not damage character of adjacent AOSF or significant archaeology	Allocation requires HIA: LC14 Assessment; Archaeological field evaluation comprising geophysical survey and trial trenching
Land east of Caistor Road, Melton Ross, DN38 6AB	BZWTZ	Melton Ross	Red/Amber	Allocation requires HIA: SM Assessment; Archaeological field evaluation comprising geophysical survey and trial trenching (potentially nationally significant archaeology)

Killingholme Power Station, Chase Hill Road,	ONISU	North Killingholme	Red = Chase Hill Wood; Amber = brownfield area	Allocation requires HIA: Archaeological Assessment that may include field evaluation
Church View Caravan Site East Halton Road	BWUMM	East Halton	Red	SM within 20m
Upperthorpe Westwoodside Doncaster DN92AL	BL3A2	Westwoodside	Red	
Yealand Flats Land	P1T39	Epworth	Red	
Land off Main Road, Graizelound, North Lincolnshire, DN9 2NB	MEM1W	Graizelound	Red	
Rear of 38 High Street, Haxey, DN9 2HH	I49OT	Haxey	Red	
The Game Farm Rear of No 28 West End Road Epworth North Lincolnshire DN9 1LB	ZHT8I	Epworth	Red	
Land behind 39 - 41 North Street	0D1F2	West Butterwick	Red	
Land behind bungalow at Roseacre, King Edward Street	L8QU2	Belton	Red	
Land to the south-east side of 76 Akeferry Road	DM9SX	Westwoodside	Red	
House and garden and land at rear of 9A West End Road	ACRMO	Epworth	Red	

Land behind 39 - 45 North Street, west Butterwick, North Lincolnshire	KFRWX	West Butterwick	Red	
Land behind 51 - 7 North Street. West Butterwick, North Lincolnshire, also access from North Street	XL7S7	West Butterwick	Red	
Land shown on HS367684, HS 363259 and HS 184669 being Close Farm, Westwoodside DN9 2DW and land to south of Close Farm and north of 52 to 72 Akeferry Road, Westwoodside DN9 2DS	VZ9MC	Westwoodside	Red	
Land next to the road on Carr Lane next to Wodcroft Gate property.	CO56S	East Lound	Red	
Land south of Jeffrey Lane	C52A2	Belton	Red	
Land to the south-east side of 76 Akeferry Road, Westwoodside, Doncaster DN9 2DS	0NYTY	Westwoodside	Red	
Land off Main Road, Graizelound, North Lincolnshire, DN9 2NB	UH350	Graizelound	Red	
Ewsters Farm, West Butterwick, DN17 3JU	FTUKR	West Butterwick	Red	

Table 7 Call for sites -Mineral Extraction Sites

Below is a summary table of potential impact of the area of search on above ground heritage assets for sites put forward for Mineral Extraction sites.

Site Address	Mineral	Ref Number	Site Area	Question 27: Is there known archaeology in or in proximity to the site? If yes, is the archaeological potential likely to warrant preservation in situ?	Question 28: Is the site in proximity to (250m) a site or building with a nationally recognised designation (Scheduled Monuments, Conservation Areas, Listed Buildings grade 1	Question 29: Are there any Grade II listed buildings in or in proximity to (250m) the site?	Question 36: Are there any other know physical constraints e.g. pipelines; proximity to transport infrastructure
--------------	---------	------------	-----------	---	--	---	--

						and 2*, Registered Historic Battlefields and Registered Parks and Gardens)?					
				Yes/No	Comment	Yes/No	Comment	Yes/No	Comment	Yes/No	Comment
Land south of A1077, to the west of South Ferriby Cement Works	Clay	10ZQM	40.31	Yes	Archaeology present. Heritage assessment required including an archaeological evaluation.	No		No			
Land extending to approx. 15ha, lying to the north and west of Hibaldstow Quarry, Redbourne Road, Hibaldstow	Limestone	4ZTO3	15	Yes	Archaeology present. Heritage assessment required including an archaeological assessment.	Yes	Scheduled Monument - Gainsthorpe Deserted Medieval village is distant (more than 250m), however issues of noise or dust will need to taken into account	No			

Land off Middlegate Lane, South Ferriby	Chalk	8KZE3	26.69	Yes	Archaeology present. Heritage assessment required including an archaeological evaluation.	No				
Land to the north of Composition Lane, Winterringham	Silica Sand	ABSRS	2.02	Yes	Archaeology present. Heritage assessment required including archaeological evaluation.	Yes	Within 20m of Scheduled Monument (DLS1729)			
Ellerholme Farm, Wroot	Sand & Gravel	JUCBG	31.48	Yes	Archaeology present. Heritage assessment required including archaeological evaluation.	No		No		

Hibaldstow Quarry	Limestone	KFZWG	13.87	Yes	Archaeology present. Heritage assessment required including an archaeological assessment.	Yes	Scheduled Monument - Gainsthorpe Deserted Medieval village is distant (more than 250m), however issues of noise or dust will need to be taken into account	No			
Land to the south of Composition Lane and east of Ermine Street, Winteringham	Silica Sand	OZYUA	4.53	Yes	The site is located within 20 metres of a Scheduled Monument – the Old Winteringham Roman Settlement, whilst there is potential for archaeological assets on the site. A heritage assessment would be required.	Yes	There are no listed buildings (Grade 1 or 2*) within or adjacent to the proposed site, whilst the nearest Conservation Area is Winteringham, around 1km to the west. The site is located within 20 metres of a Scheduled Monument – the Old Winteringham Roman Settlement, whilst there is				

							potential for archaeological assets on the site. A heritage assessment would be required.				
Land to the east of Holme Lane, Scunthorpe	Silica Sand	RZARY	117	Yes	Archaeology present (extensive significant archaeology). Heritage assessment including archaeological evaluation required.	No		No			
Land to the south of A1077, Eastfield Farm, Winteringham	Silica Sand	TEQPK	3.19	Yes	Archaeology present (significant archaeology). Heritage assessment required including archaeological evaluation.	Yes	Site is located within 180m of a Schedule Monument (DLS1729)				

Land at North Moor Road/Butterwick Road Crossroads, Messingham	Silica Sand/Sand	YMNEY	10.94	Yes	Archaeology present. Heritage assessment required including archaeological assessment.	No

Heritage Impact Assessment and the Preferred Options Local Plan

All the call for sites submitted to the Council were assessed through the Strategic Housing and Employment Land Availability Assessment. The results of the Heritage Assessment have been shown earlier and all these results enabled the Council to propose their Preferred Options for Housing Employment and Mineral Extraction sites.

Housing Sites

A key role of the Local Plan, as emphasised by NPPF, is to meet, where possible, all identified housing needs and to deliver a wide choice of high quality homes, widen opportunities for home ownership and to create sustainable, inclusive and mixed communities. This includes meeting the needs of the various groups that have differing housing requirements. To significantly boost the supply of housing, local planning authorities should use their evidence base to ensure that their Local Plan meets fully the objectively assessed needs (OAN) for market and affordable housing in their housing market area. This needs to be consistent with the policies of the NPPF, including identifying key sites that are critical to the delivery of the housing strategy over the plan period.

The Local Plan needs to provide sufficient homes in order to meet our local needs and to help support the creation of sustainable communities.

A number of proposed housing sites were put forward at the Preferred Options Local plan and these were all assessed through the Strategic Housing and Employment Land Availability Assessment, Sustainability Appraisal and Strategic Environmental Assessment.

The housing sites proposed in the Preferred Options Local Plan are listed below and show they score in relation to the Heritage Asset Impact.

Red - Development of the site would cause substantial harm to a designated or non-designated heritage asset or their setting, which cannot be reasonably mitigated.

Amber - Development of the site could have a detrimental impact on a designated or non-designated

Green - Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets or their settings.

Local Plan	HELA DPD/ Planning Ref.	Settlement	Site Location	Greenfield/ Brownfield	Site Area (Ha)	Remainin g Dwellings	Heritage Asset Impact
SSH1p , SSH2p	Lincolnshire Lakes (PA/2013/1000 and PA/2013/1001)	Scunthorpe	West of Scunthorpe	Greenfield	1000	3000	Amber- Allocation requires HIA
H1P-1p	SCUH-1 (PA/2015/0246)	Scunthorpe	Phoenix Parkway Phase 1	Greenfield	7.96	246	Green
H1P-2p	SCUH-2	Scunthorpe	Phoenix Parkway Phase 2	Greenfield	1.88	56	Green
H1P-3p		Scunthorpe	Land at Burringham Road	Brownfield	5.24	144	Amber- Allocation requires HIA
H1P-4p	SCUH-C7	Scunthorpe	Land at former South Leys School , Enderby Road	Greenfield	3.27	120	Green
H1P-5p	PA/2019/1782	Scunthorpe	Moorwell Road	Greenfield	8.36	200	Green

H1p-6p	BARH-1 & BARH-2	Barton Upon Humber	Pasture Road South	Greenfield	21.4	199	Amber- Allocation requires HIA
H1P-7p		Barton Upon Humber	Land off Barrow Road	Greenfield	6	200	Amber- Allocation requires HIA
H1P-8p		Barton Upon Humber	Land to the South of Barrow Road	Greenfield	6.5	213	Amber- Allocation requires HIA
H1P-9p		Barton Upon Humber	Land at Caistor Road	Greenfield	13.91	360	Amber- Allocation requires HIA
H1P-10p		Barton Upon Humber	Land between Caistor Road and Eastfield Road	Greenfield	2.71	98	Amber- Allocation requires HIA
H1P-11p	BRIH-1 &	Brigg	Land north of Atherton Way	Brownfield	4.4	149	Amber- Allocation requires HIA
	BRIH-5						Green
H1P-12p	BRIH-2	Brigg	Land at Western Avenue	Greenfield	5.54	186	Amber- Allocation requires HIA
H1P-13p	BRIH-3	Brigg	Wrawby Road Phase 2	Greenfield	11.97	333	Amber- Allocation requires HIA
H1P-14p	BRIH-4	Brigg	Wrawby Road Phase 1	Greenfield	4.31	152	Amber- Allocation requires HIA
H1P-15p		Barnetby le Wold	Land at King's Road Land	Greenfield	2.38	74	Amber- Allocation requires HIA
H1P-16p	PA/2018/845	Barrow upon Humber	Former Spencer Group Mill Lane	Brownfield	1.56	50	Green
H1P-17p		Barrow upon Humber	Land off Ferry Road/Chestnut Rise	Greenfield	1.8	59	Amber- Allocation requires HIA
H1P-18p		Barrow upon Humber	Land off Ferry Road	Greenfield	1.65	54	Amber- Allocation requires HIA
H1P-19p		Broughton	Land off the B1207	Greenfield		74	Amber ARCH, HS = ARCHAEOLOGICAL ASSESSMENT
					2.4		
H1P-20p	CROH-1	Crowle	Land to the east of Fieldside	Brownfield	2.8	75	Amber- Allocation requires HIA

H1P-21p		Crowle	Land off Mill Road	Greenfield	1.05	57	Green
H1P-22p		Crowle	Land off Fieldside	Greenfield	0.5	20	Amber- Allocation requires HIA
H1P-23p		Epworth	Yealand Flats	Greenfield	2.63	92	Red
H1P-24p		Epworth	Land off Station Road	Brownfield	1.45	45	Red
H1P-25p		Haxey	Land at Field House	Brownfield/ Greenfield	2.96	84	Red
H1P-26p		Messingham	Land to the North of Brigg Road	Greenfield	4.67	92	Amber- Allocation requires HIA
H1P-27p		Winterton	Land at Top Road	Greenfield	2.9	83	Amber- Allocation requires HIA
H1P-28p	PA/2018/1759	Winterton	Land south of Coates Avenue	Greenfield	1.46	40	Green
H1P-29p	PA/2019/996	Hibaldstow	Brook House Farm, Church Street	Greenfield	0.61	14	Green
H1P-30p		Ealand	Land adjacent to Ivy House Farm, on Main street.	Greenfield	1	21	Amber- Allocation requires HIA
H1P-31p		East Halton	Land off Mill Lane	Greenfield	1	29	Amber- Allocation requires HIA
H1P-32p		Scawby	Land south of Main Street	Greenfield	0.79	11	Amber- Allocation requires HIA
H1P-33p		South Killingholme	Land at School Road	Brownfield	0.69	21	Green
H1P-34p		Westwoodside	Land south of Doncaster Road	Greenfield	0.97	29	Amber- Allocation requires HIA
H1P-35p		Wrawby	Land off Barton Road	Greenfield	1	25	Amber- Allocation requires HIA
H1P-36p		Wroot	Land at Field Lane	Greenfield	0.43	11	Amber- Allocation requires HIA

The sites which scored Red and Amber require a further Heritage Impact Assessment. Development will be expected to avoid or minimise conflict between any heritage asset's conservation and any aspect of the proposal, taking into account an assessment of its significance (NPPF paragraph 129).

Housing Site Assessments for Heritage Assets

The assessments identify the significance of any heritage assets affected by the allocation, assesses whether allocation might lead to potential harm (or benefit) to this heritage significance, and how any harm could be reduced or mitigated. The Assessments are available to view at Appendix 1.

Employment Sites

National policy and guidance requires Local Plans to proactively drive and support sustainable economic development to deliver jobs that the country needs. The new Local Plan must ensure that sufficient employment land of the right type is available in the right places and at the right time to support growth and innovation. It must also address other issues that are important to businesses such as affordable homes for workers, transport, and infrastructure, and will need to address how many new jobs need to be provided and how best can we support our existing and growing employment sectors. Barriers to investment should be addressed and priority areas identified for economic regeneration, infrastructure provision and environmental enhancement. Economic development is a critical component that drives growth, creating high wage jobs and facilitating an improved quality of life.

A number of proposed employment sites were put forward at the Preferred Options Local plan and these were all assessed through the Strategic Housing and Employment Land Availability Assessment, Sustainability Appraisal and Strategic Environmental Assessment. Below in the table are the Heritage officer comments in relation to each of the sites :-

Local Plan Preferred Employment Sites and Heritage Impact Assessment Outcome

Location	Local Plan Site Reference	Site Location	Use *	Allocated site area ha	Heritage Asset Impact
Scunthorpe	EC1-1p	Normanby Enterprise Park	B1,B2, B8	38.87	<p>Amber. A Heritage asset of archaeological significance is located within the site - North Conesby medieval moat. Not currently designated as a Scheduled Monument but of equivalent significance, the impact of development on the monument and its setting should therefore be considered.</p> <ul style="list-style-type: none"> • The designated Scheduled Monument of Flixborough Anglo-Saxon settlement lies just below the west side of NEP near the moat. • Planning applications should be accompanied by a Heritage Assessment comprising desk-based and field evaluation surveys and detailed mitigation proposals.

Scunthorpe	EC1-2p	Land north of Tesco	B1, B8	39.96	Amber. Allocation requires HIA: Archaeological Mitigation Strategy
Kirmington	EC1-3p	Humberside Airport	B1, B8	12	Amber. Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching (parts of)
Kirmington	EC1-4p	Humberside Airport	B1, B8	7.8	Amber. Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching (parts of)
Sandtoft	EC1-5p	Sandtoft Business Park	B1, B8	55.3	Allocation requires HIA: LB Assessment; Archaeological field evaluation comprising geophysical survey and trial trenching
Barton upon Humber	EC1-6p	Land to the north west of the A15 Barton Interchange	B1, B2, B8	15	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching.
Barnetby Top	EC1-7p	Land to the south of Barnetby Top Interchange and to the west of the A18	Service Station and lorry park	6.14	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching.
Barnetby Top	EC1-8p	Land to the south of Barnetby Top Interchange and to the east of the A18	B1, B2, B8	10	Allocation requires HIA: Archaeological field evaluation comprising geophysical survey and trial trenching.
M180 Junction 2	EC1-9p	Land to the south of Crowle gyratory	B1, B8	5	Allocation requires a HIA.
Total				190.07	

Employment Site Assessments

The assessments identify the significance of any heritage assets affected by the allocation, assesses whether allocation might lead to potential harm (or benefit) to this heritage significance, and how any harm could be reduced or mitigated. The Assessments are available to view at Appendix 1.

Mineral Site Assessments

The assessments identify the significance of any heritage assets affected by the allocation, assesses whether allocation might lead to potential harm (or benefit) to this heritage significance, and how any harm could be reduced or mitigated. The Assessments are available to view at Appendix 1.
