**OCTOBER 2022**

## LOCAL GREEN SPACE

### Assessment Methodology

#### 1. Introduction and Policy Context

- 1.1 North Lincolnshire Council is preparing a new Local Plan as a framework for future development, which will cover the period to 2038. As part of the process North Lincolnshire Council has undertaken a number of pieces of work on supporting evidence and methodologies for proposed Local green Space sites.
- 1.2 The National Planning Policy Framework (NPPF) includes policies relating to the designation of land that is significant to local communities as a 'Local Green Space' designation. This gives communities an opportunity to identify and protect demonstrably significant green spaces in their local area. The criteria by which the Local Planning Authorities will judge such applications for Local Green Space are set out within this assessment.
- 1.3 NPPF states that Local Green Space should only be designated when a Local Plan or Neighbourhood Plan is prepared or reviewed.
- 1.4 As part of the process of preparing a new Local Plan the council has undertaken a 'Call for Sites' exercise in which the public were invited to submit sites for various purposes. Amongst these submissions were proposals for land to be designated as 'Local Green Space'. This document expands on the criteria that the council has used in order to assess these sites for their suitability and includes the assessment of site recommendations as an Appendix.

#### National Policy Context

- 1.5 NPPF paragraphs 101, 102 and 103 are specifically related to Local Green Space designation.
- 1.6 Paragraph 101 stipulates that local communities can identify, through local and neighbourhood plans, green areas of particular importance to them to be granted special protection as Local Green Space. Such designation should only be designated when the plan is prepared or updated and be capable of enduring beyond the end of the plan period.
- 1.7 Paragraph 102 expands on how the appropriateness of such applications should be judged, including guidance on proximity, significance, and scale of a proposed site. This paragraph states that Local Green Space designation should only be used where the green space is:
- a) in reasonably close to the proximity to the community it serves;
  - b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and
  - c) local in character and is not an extensive tract of land.
- 1.8 Paragraph 102 establishes broad criteria by which a Local Green Space proposal might be assessed: proximity, beauty, historical significance, recreational value, tranquillity, wildlife, and site size/scale. It does not, however, define what is specifically meant by these.

1.9 Paragraph 103 clarifies that local policy for managing development within Local Green Spaces should be consistent with Green Belt policy. This means that a Local Green Space could not be developed upon unless there are “very special circumstances”.

1.10 The NPPF does not define what is meant by terms such as “reasonably close”, “significant” or “extensive” for the purposes of this designation. However, Planning Practice Guidance does provide some clarification. Key points include:

- Local Green Space should not be used in a way that undermines the aim of plan making (plans must identify land in suitable locations to meet identified development needs);
- Local Green Space will rarely be appropriate where the land has planning permission for development, although exceptions include where this can no longer be implemented, or the development is compatible with the designation;
- A new community can designate Local Green Space if it is of particular significance to that community;
- Local Green Space can be designated on land already protected by other designations (such as an SSSI) if this can provide additional benefits;
- Designation of Local Green Space is a matter for local discretion and must meet the criteria of NPPF paragraph 102.
- Proximity of Local Green Space to the community it serves depends on local circumstances. If public access is a key factor then the site would normally be in easy walking distance of the community it serves.
- Sites will not necessarily have public access to them. This is particularly the case in areas protected for reasons of wildlife, historic significance, and/or their beauty which may be protected. Where sites are not in public ownership, the local planning authority or neighbourhood plan group should contact landowners at an early stage about proposals to designate land. Management of the Local Green Space remains the responsibility of the landowner unless local communities agree with the landowner a means of helping to manage the site;
- There are no minimum and maximum sizes for Local green Space providing the criteria of NPPF paragraph 102 are met. However, blanket designation of open countryside is inappropriate.
- Local Green Space can also be registered as an Asset of Community Value.

1.11 The Planning Practice Guidance provides useful additional information on how the government see Local Green Space designations being utilised, their scope, and limits. The above summaries should be taken into account alongside NPPF paragraphs 101-103.

1.12 However, whilst Planning Practice Guidance provides some clarification on Local Green Space designation it does not specify how the qualifying criteria should be quantified and judged. These criteria have been left to Local Authorities to determine.

## **2. North Lincolnshire Methodology**

2.1 Having regard to national guidance and local interpretations of the NPPF Local Green Space policy, a methodology for assessing applications for the designation of Local Green Space has been devised, as follows:

**Step 1: Site Submissions**

- 2.2 The NPPF is clear that it is local communities that should identify potential LGS's, through Local and Neighbourhood Plans. Local communities were given the opportunity to submit LGS's during the Local Plan 'Call for Sites' period at the Initial Consultation (Regulation 18) between late February and mid-April 2017, at Issues & Options (Regulation 18) in February and March 2018, and at Preferred Options (Regulation 18) in February and March 2020. They were asked to provide a map of the site and supporting information as to how they believe the site meets the criteria for LGS designation.

**Step 2: Site Sieve**

- 2.3 Sites submitted for consideration as LGS were assessed by the Place Planning team on a site-by-site basis. All the sites proposals for LGS have been mapped on Geographic Information System (GIS) and given a unique reference number. Unfortunately, on some occasions it was not possible to identify LGS nominations from the information provided. Reasons for this include the omission of a clear site map, or that general statements were provided for proposed land use, such as 'open space'. These sites were removed from the assessment process.

**Step 3: Site Assessment**

- 2.4 The sites that remained were assessed via a Local Green Space Assessment Framework (Appendix 1) according to the criteria of the NPPF and Government guidance, as detailed below.

- 2.5 As stated in paragraph 1.7 above, the NPPF stipulates the conditions of Local Green Space designation, as follows:

*"The Local Green Space designation should only be used where the green space is:*

- a) in reasonably close proximity to the community it serves;*
- b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and*
- c) local in character and is not an extensive tract of land."*

- 2.6 Therefore, proposed Local Green Space was assessed against these criteria. For the purposes of this Local Green Space Assessment, the Council has defined the following characteristics in accordance with the NPPF.

- 2.7 For the purposes of this Assessment the following criteria was applied:

- *"Reasonably close proximity"* is defined as no more than 1.5km from the boundary of the settlement in question.
- *"Demonstrably special to a local community"* it must be demonstrated that the site is special to the local community by meeting at least one of the following criteria: aesthetic; historic; natural; recreational; and tranquillity value. To be designated as Local Green Space each site must be shown to have value in at least one of these areas which is significant in the context of the settlement in question. The Council can only assess sites based on the evidence that we can directly gather; thus anecdotal evidence was not utilised in the assessment of a proposed site.
- *"Local in character"* was defined as *"Reasonably close proximity"* as above.
- *"Extensive tract of land"* was defined as a plot of land over 3 hectares in area.

- 2.8 The aesthetic, historic, natural, and recreational value of proposed sites was assessed as follows:

- Aesthetic - the site must be of significance due to its beauty. This includes, but is not necessarily limited to, 'natural beauty', and the site could incorporate man-made features that contribute to its overall visual attractiveness. In addition to the visual attractiveness of the site, consideration was given to how the site relates to the local landscape, townscape, and character, and how the site functions aesthetically within it. The site may also provide locally valued views to or from it.
- Historical - the site must be demonstrably historically significant which may be because:
  - historical features exist on the site such as a scheduled monument, listed building, or veteran trees and ancient hedgerows;
  - the site contributes to the significance of an heritage asset;
  - an event of demonstrable historical significance has taken place on the site, or historical rituals have occurred on the site.
  - the site may have a monument or memorial to an historical event or period located on it (of significant local or community interest);
  - the site has an historical artistic or literary connection or is mentioned in an historical text (such links should be well documented, substantiated, and significant); or
  - the character and appearance of the site contributes to an important historical setting.
- Natural - there is evidence that the site has a richness of wildlife which can be objectively supported. Habitats, species, flora, and fauna found on the site may be recognised through an existing wildlife designation or through wildlife protection regulations and acts. The site may also support irreplaceable habitats or form part of a wildlife corridor or green infrastructure. Additionally, the site may be demonstrably used by the local community for a local wildlife study, or for wildlife-related activities. Such activities may not be available elsewhere in the locality or are specific to this site.
- Recreational - the public have access to the site which supports a variety of recreational opportunities that are not supported on other open spaces within the local community.

2.9 The NPPF stipulates the relationship between Local Green Space and the development needs of an area as follows: *"The designation of land as Local Green Space through local and neighbourhood plans allows communities to identify and protect green areas of particular importance to them. Designating land as Local Green Space should be consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services."* (NPPF Para 101)

2.10 The above makes it clear that Local Green Space designation cannot take priority over the development or service needs of an area. The purpose of Local Green Space is not to stop development within an area. Therefore, a general desire to stop development within an area cannot be used as a justification for the designation of a site as Local Green Space. The justification must relate to the site in question and specify why this site in particular is justified for Local Green Space designation. In order to overcome this the following criteria are applied:

- Existing Permissions - allocation of a site with an existing planning permission on it was not permitted unless it could be shown that:
  - The permission will not be implemented; or
  - The designation would be compatible with the permission.
- Existing Allocations - allocation of a site as Local Green Space on land already designated for an alternative use in the Local Plan or Neighbourhood Plan would not be acceptable, unless:
  - the Local Green Space can be incorporated into the site as part of the allocated development; or

- the site is no longer being promoted for this use or is incapable of being implemented.

2.11 Local Green Space is not the only potential way of conserving areas of green space. The Council has options to designate areas of recreation, natural, or amenity importance at its own discretion. This is not subject to the same strict criteria of Local Green Space and is likely to provide a lesser degree of protection. Therefore, if a proposed site fails to be designated as Local Green Space it may be considered for other designations under the new North Lincolnshire Local Plan which could offer other forms of protection (e.g., playing field, or important open space).

2.12 The designation of sites for Local Green Space have been undertaken on a case-by-case basis, and in some cases other designations may negate Local Green Space designation. For example, Local Nature Reserves (LNR) are already protected and there would be no merit in designating such a site as Local Green Space.

2.13 Local Green Space sites must already exist prior to designation. For example, proposed green space forming part of plans for a new residential development would not be considered for Local Green Space designation.

#### **Step 4: Selecting Sites for Local Green Space Designation**

2.14 A detailed assessment for each site was created based on the information submitted during “Call for Sites”. A list of suitable sites was established from this framework along with a justification as to why each site was suitable or why it has been rejected. A total of 16 sites are recommended for designation as LGS. It is important to note that this process was replicated after each new “Call for Sites” engagement exercise.

2.15 Table 1.0 below identifies the assessment process utilising the agreed methodology and the recommendation using a ‘Red Amber Green rating’. Members of the public, landowners and organisations have been given the opportunity to comment on the proposed LGS designations as part of the Local Plan consultation process.

### **3. Designating Local Green Space**

3.1 Subject to the above criteria being met for designation and subject to the Local Authority and, if relevant, a Neighbourhood Plan group being satisfied at the special nature of the site proposed for this purpose it would be included in the Local Plan as a proposed site allocation.

3.2 This proposal will then be tested at examination stage by an independent planning inspector who will ensure that the whole Plan, including the rationale for proposed Local Green Space, is robust and sound.

3.3 Subject to this being found sound, the LGS will be formally designated upon adoption of the Local Plan. In accordance with the NPPF, the site will have a protected status.

3.4 The local planning authority received a number of representations for land to be allocated as local green space. These have been assessed as set out in Appendix 1 Local Green Space Assessment.

3.5 For the North Lincolnshire Local Plan, the proposed Local Green Spaces sites are as follows:

**Table 1.0 North Lincolnshire Local Plan Local Green Space Sites**

Site Name	Location
Hood Field and 2 pieces of associated land to west of Haxey, Upper Thorpe Road Westwoodside (TACME)	Haxey
The Paddock, adjacent to Churchside, Appleby (RGNW0) (IPANA)	Appleby
Playing Field, Appleby (TTCYP)	Appleby
The Green Kirton in Lindsey (X5H2A)	Kirton in Lindsey
Whipping Post / Sunny Hill Triangle, Kirton in Lindsey (RJIL2)	Kirton in Lindsey
Cemetery, Grove Street, Kirton in Lindsey (GKQKS)	Kirton in Lindsey
Ash Well, Kirton in Lindsey (7JRKJ)	Kirton in Lindsey
Former RAF Kirton Playing Fields, Kirton in Lindsey (KOXG1)	Kirton in Lindsey
Playing field to the rear of former Brumby Hospital, East Common Lane, Scunthorpe (NJAHP) (HRGCK)	Scunthorpe
Land to the north of the track leading to Ladysmith Cottage, Top Road, Worlaby (TE9Y1)	Worlaby
Top Road, Worlaby (KQKKO)	Worlaby
Woodland adjoining the south side of The Hill, Worlaby and being contiguous with a wetland area to the south and to Hillside Plantation to the east. (KFOBT)	Worlaby
The Hill, Worlaby, (W8258) <i>(site joined with 6MPOM to form single site)</i>	Worlaby
Land within the Hurds Farm Estate, Worlaby (TO2O8)	Worlaby
The Hollows	Worlaby
Land adjacent to The Hill, Worlaby (6MPOM) <i>(site joined with W8258 to form single site)</i>	Worlaby

#### 4. Next Steps

- 4.1 This Evidence Report demonstrates the rationale for the proposed policy as contained in the September 2022 Submission North Lincolnshire Local Plan. It demonstrates how the council has assessed proposed Local Green Space sites for their suitability and includes the assessment of site recommendations as an Appendix.
- 4.2 Sites recommended for designation as LGS in Appendix One: Local Green Space Assessment are shown on the policies map that accompanies the Submission Local Plan. Those sites not considered to meet the LGS criteria may still be protected under other policies in the Local Plan and/or via national or European legislation. Members of the public, landowners, and organisations have had the opportunity to comment on the proposed LGS designations as part of the Local Plan consultations.
- 4.3 The comments received as part of the Addendum consultation, in addition to the comments received to the North Lincolnshire Local Plan (2020-2038) Publication Draft consultation, will be submitted to the Secretary of State for consideration at examination along with the Plan and supporting documents.
- 4.4 The examination will consider whether the proposals in the Local Plan are sound; this might include examination of the LGS designations. Further information on the different stages of

Local Plan preparation, including examination and adoption, can be found in the Local Development Scheme under the Evidence Base link, here:
