

PUBLIC HEALTH OUTCOMES PROFILE 2016/17

MANOR FARM CHILDREN'S CENTRE

This profile provides a brief picture of public health outcomes for mothers and under 5s in the Manor Farm Children's Centre catchment area for 2016/17. This data, combined with service reach and activity data, should help agencies understand what factors are driving health improvement in this local population and enable the allocation and prioritisation of resources effectively. Each profile contains information on the child population in each catchment area, wider determinants of health and indicators of maternal and child health

- Manor Farm Children's Centre is located in Scunthorpe South locality with the catchment mainly including Kingsway with Lincoln Gardens ward.
- 375 under 5s live in this catchment area which represents 4% of all under 5s in North Lincolnshire and is the second smallest under 5 population.
- The adult population of this area have slightly better health outcomes than average with male and female life expectancy marginally above the North Lincolnshire average.
- The proportion of children living in output areas that fall within England's 30% most deprived neighbourhoods is significantly above average at 44%. In contrast, the proportion of children under 16 living in households in receipt of out of work benefits is lower than average for North Lincolnshire and England at just over 10%.
- Births to BME women are rising but remain below the North Lincolnshire average.
- Smoking in pregnancy is lower than average, though not significantly.
- The breastfeeding continuation rate is the highest in North Lincolnshire in this catchment, though Initiation rates are average.
- The area has the highest rate of admission for accidental injury (though this is not significant), and below average admissions to A&E.
- The proportion of children with excess weight at 11 years old is the highest of any Children's Centre area, at 45%, though this is not a significant difference to North Lincolnshire as a whole. The proportion of children with excess weight at 5 years is also above average.

DATA TRENDS 2012-2013 to 2016-2017

Recent Progress

- Smoking in pregnancy rates have declined since 2014-15, though the numbers are small and not significant. Despite this, within the 5 years there has still been a small increase.
- The number of live births has declined in the area since 2013-14, and is now below the North Lincolnshire average.
- In contrast breastfeeding initiation rates in this area have improved in the last 5 years, however there has been fluctuations in the figures. Currently the rate is around 9 percentage points higher than it was in 2012-13, and closer to the North Lincolnshire average.
- School Readiness at 5 has increased in the area over the past 4 years, with the rate of children achieving a good level of development increasing over 15 percentage points.
