

# Axholme Central Ward Profile 2021

## Part of the North Lincolnshire JSNA

These profiles aim to provide a brief picture of public health outcomes in each of North Lincolnshire's 17 electoral wards

The information contained within the profiles use the latest published data available at the time of writing.

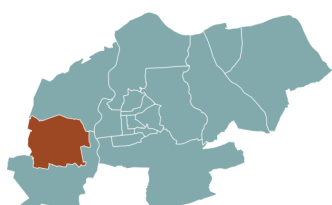

The profiles should help us understand what factors are driving health improvement in each area. They should also help us identify where resources could be targeted to improve health and wellbeing and reduce health inequalities.

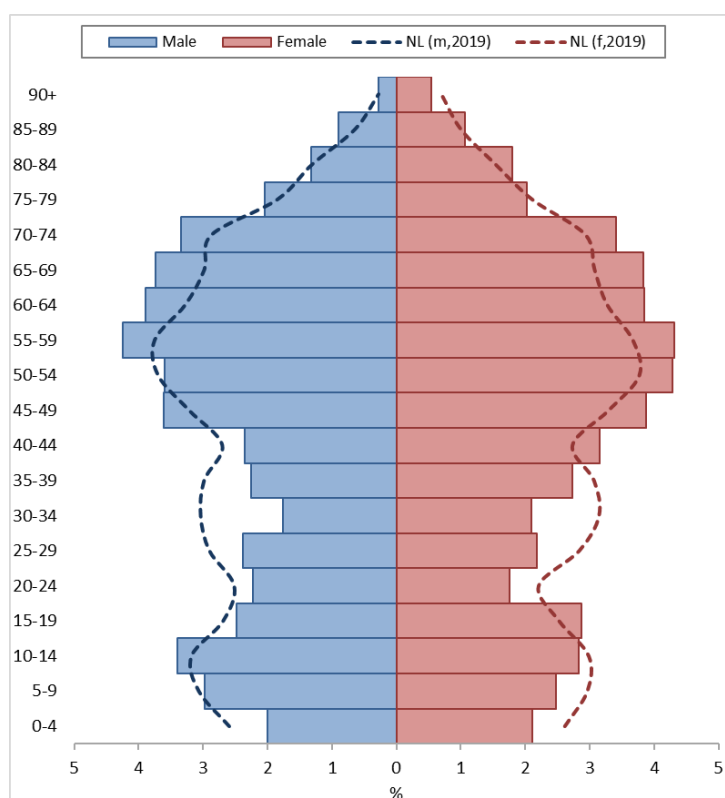

Axholme Central ward borders Axholme South ward to the south and east, and Axholme North to the north. To the west it borders Doncaster local authority.

It has a population of 7700 residents, equivalent to 127 per square kilometre, none of which reside in the top 20% most deprived neighbourhoods of England. More localised pockets of deprivation may still exist in the ward.

The ward age profile shows slightly more people aged 45+ years than overall for North Lincolnshire, fewer under 5s and fewer adults aged 20-40.

# Axholme Central Ward 2021

## Ward Summary

- Axholme Central has the 4th smallest ward population in North Lincolnshire with proportionally more residents over the age of 65 than the local average and less children from a minority ethnic background.
- The claimant count, children living in relative low income (aged under 16) and over 65s in receipt of pension credit are all better than the North Lincolnshire average, however, the claimant count rate is significantly worse than 2017.
- Rates of police reported crime, violent crime and anti-social behaviour are significantly lower than North Lincolnshire overall and England and Wales.
- The ward has the highest percentage of low birth weight babies in North Lincolnshire, although numbers are low and not statistically significant.
- Of all wards in North Lincolnshire, Axholme Central has the second lowest percentage of young children reaching a good level of development and readiness for school at 5 years of age.
- With one in seven reception year children having excess weight, this is the lowest of any ward in North Lincolnshire and those in Year 6 are also amongst the lowest in North Lincolnshire.
- The rate of children in need is amongst the lowest in North Lincolnshire but not significantly less than average and that for children with an Early Help Assessment is also amongst the lowest in North Lincolnshire.
- Admissions rates for avoidable injury in under 15s are the highest of all the North Lincolnshire wards and significantly worse than the England rate with those for 15-24 year olds also amongst the highest locally.
- The percentage of people in receipt of Employment and Support Allowance is one of the lowest in North Lincolnshire and significantly lower than the local and national average.
- Emergency hospital admissions for self-harm are rare and those for alcohol specific conditions are significantly lower than North Lincolnshire and England, having significantly improved recently.
- Adult emergency hospital admissions are the lowest in North Lincolnshire and significantly better than average although those for coronary heart disease are significantly worse than the national average.
- The percentage of over 65s in receipt of attendance allowance is the lowest ranked ward in the local authority area and significantly better than both North Lincolnshire overall and England.
- The rate of emergency admissions for falls in over 65s is low and significantly better than overall for England and those for hip fractures are rare.
- Although not statistically different, life expectancy at birth for women is 3 years higher than that for North Lincolnshire as a whole whilst that for men is similar.
- Deaths from all causes are significantly lower than the North Lincolnshire average and those considered preventable are amongst the lowest in North Lincolnshire.
- Premature deaths from respiratory disease are amongst the lowest in North Lincolnshire whilst those from coronary heart disease and cancer are close to the local authority average. However none of these differences are considered statistically significant.
- About two in five local residents die in their usual place of residence which is below the North Lincolnshire average, but not statistically so.

Relative low-income is defined as a family whose equivalised income is below 60 per cent of contemporary median income. Gross income measure is Before Housing Costs (BHC) and includes contributions from earnings, state support and pensions. Total of figures from each ward does not match North Lincolnshire figure due to statistical disclosure controls applied by the DWP. England Figures from Fingertips, PHE.
Claimant Count	Period - Mar 2020; Rate: rate per 1,000; Numerator: Claimant Count, NOMIS Mar 2020; Denominator: Area resident population (persons, 16-64yrs) , ONS 2019; Notes: Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work, and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding. Population data for Mar 17 from is 2016 mid year population estimates.
