Bottesford Ward Profile 2021

Part of the North Lincolnshire JSNA

These profiles aim to provide a brief picture of public health outcomes in each of North Lincolnshire's 17 electoral wards

The information contained within the profiles use the latest published data available at the time of writing.

The profiles should help us understand what factors are driving health improvement in each area. They should also help us identify where resources could be targeted to improve health and wellbeing and reduce health inequalities.

Bottesford Ward 2021

Ward Summary

- Bottesford contains around 6% of the total population of North Lincolnshire, comprising significantly lower proportions of children and working age adults and significantly more 65+ year olds compared with the local authority as a whole. The proportion of children from minority ethic backgrounds is very low.

- Children living in relative low income, claimant counts and the rate of over 65s in receipt of pension credit are some of the lowest in North Lincolnshire and significantly below average.

- Police reported crime, violent crime and antisocial behaviour are all low and significantly lower than local and national averages.

- The birth rate in the ward is lower than North Lincolnshire and significantly lower than England's as a whole and low birth weight babies are rare; with less than one in twelve women smoking at delivery this is the second lowest of all wards and the proportion of mothers initiating breastfeeding is above average locally but not significantly.

- The percentage of children with a good level of development at 2½ years the highest in North Lincolnshire and significantly above the national proportion, however, readiness for school is only average. GSCE attainment is above average but not significantly.

- With one in six younger children having excess weight this is the second lowest of all wards in North Lincolnshire, however by 11 years it has risen to become the forth highest with nearly two out of five carrying excess weight.

- Children in need are amongst the lowest of all wards and children with an early help assessment are lower than the overall rate for North Lincolnshire but not significantly.

- Admissions for avoidable injury for children and young adults are similar to the North Lincolnshire average.

- The ward has the lowest percentage of residents in receipt of employment and support allowance and is amongst the lowest for over 65s in receipt of attendance allowance, both of which are significantly below local and national averages.

- Hospital admissions for coronary heart disease are similar to the local average but significantly worse than that for England.

- Whilst the rate of admission episodes for alcohol specific conditions in the ward is similar to the local average, admissions for self-harm are slightly higher although not significantly.

- The rates of emergency hospital admissions for working age adults and the elderly are significantly lower than average as are admissions for falls and hip fractures in the elderly.

- Male and female life expectancy at birth are significantly better than North Lincolnshire and England overall and the highest of all wards for females at nearly 5 years above North Lincolnshire and the second highest for males at 4½ years above.

- All cause mortality is the lowest of any ward in North Lincolnshire and deaths from preventable causes are the second lowest which is significantly better than the local and national rates.

- Whilst premature deaths from cancer are similar to the North Lincolnshire and England rates, those from coronary heart and respiratory diseases are some of the lowest in North Lincolnshire with CHD statistically lower than average.

- With only a third of residents dying at their usual place of residence, Bottesford has the lowest proportion of all wards in North Lincolnshire which is statistically worse than the local authority average.

Relative low-income is defined as a family whose equivalised income is below 60 per cent of contemporary median income. Gross income measure is Before Housing Costs (BHC) and includes contributions from earnings, state support and pensions. Total of figures from each ward does not match North Lincolnshire figure due to statistical disclose controls applied by the DWP. England Figures from Fingertips, PHE.
Claimant Count	Period - Mar 2020; Rate: rate per 1,000; Numerator: Claimant Count, NOMIS Mar 2020; Denominator: Area resident population (persons, 16-64yrs) , ONS 2019; Notes: Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work, and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding. Population data for Mar 17 from is 2016 mid year population estimates.
