

Brumby Ward Profile 2021

Part of the North Lincolnshire JSNA

These profiles aim to provide a brief picture of public health outcomes in each of North Lincolnshire's 17 electoral wards

The information contained within the profiles use the latest published data available at the time of writing.

The profiles should help us understand what factors are driving health improvement in each area. They should also help us identify where resources could be targeted to improve health and wellbeing and reduce health inequalities.

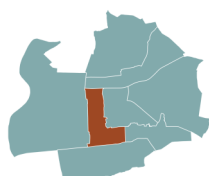

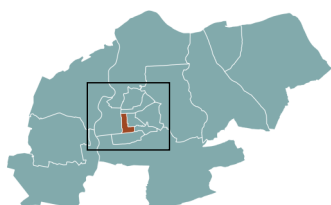

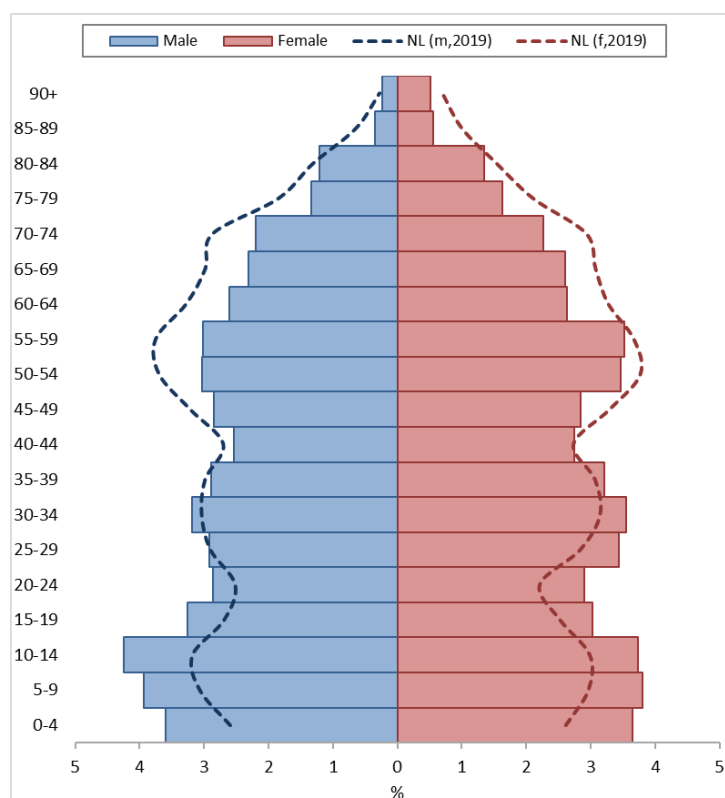

Brumby ward borders Bottesford to the south, Ashby ward and Kingsway with Lincoln Gardens ward to the east, Burringham and Gunness ward to the west and Town to the north.

It has a population of 11900, equivalent to 3400 residents per square kilometre which is the second most densely populated ward, of which nearly two thirds (65%) live in North Lincolnshire's 20% most deprived neighbourhoods.

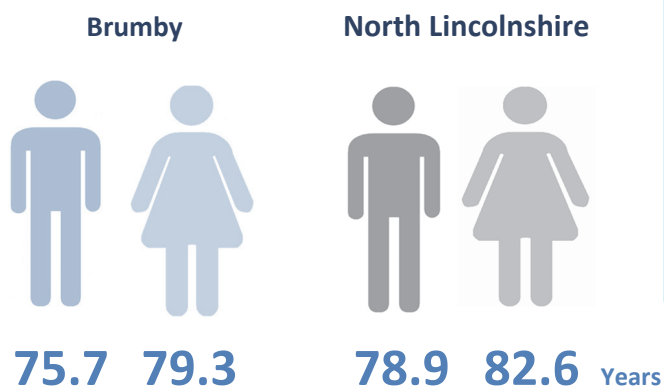

The ward population profile shows a comparatively younger population than North Lincolnshire with more people aged 0-34 and fewer people aged 40+

Life expectancy at birth by ward

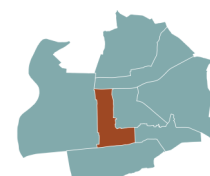

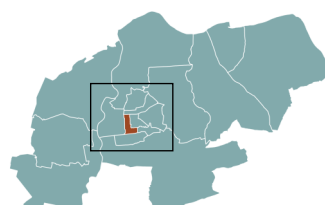

Brumby Ward 2021

Ward Summary

- Brumby has the 4th largest population in North Lincolnshire and the second largest density with comparatively more children and young adults and fewer working age and elderly residents; two thirds of residents live in England's 20% most deprived neighbourhoods and there is an average proportion of minority ethnic children.
- The percentage of children living in relative low income, claimant counts and over 65s in receipt of pension credits are all some of the highest in the local authority and significantly higher than North Lincolnshire and England averages.
- Levels of recorded crime, violent crime and antisocial behaviour are all significantly higher than the North Lincolnshire and England and Wales averages.
- The fertility birth rate is the highest in North Lincolnshire with an average proportion of low birth weight babies, the second highest proportion of smoking during pregnancy and the second lowest initiation of breastfeeding.
- The ward has a lower percentage of children reaching a good level of development at 2½ than North Lincolnshire as a whole, school readiness is average and GCSE attainment for English and Maths is the worst in North Lincolnshire and significantly below local and national rates.
- Although not statistically significant, the percentages of children with excess weight at age 5 and 11 are amongst the highest in North Lincolnshire with two out of five 11 year olds considered to be overweight or obese.
- Whilst the percentage of under 18s with an early help assessment is slightly lower than the average for North Lincolnshire, the rate of children in need is significantly higher than overall.
- The rate for avoidable injury admissions in children is similar to the local average whilst those for older children and young adults are above local and national levels but not significantly; this age group also has a higher than average admission rate for self-harm but it is still much lower than the national rate.
- The percentage of individuals in receipt of Employment and Support Allowance is significantly higher than both the North Lincolnshire and England rates, and the highest of all the wards in North Lincolnshire.
- Overall emergency admissions for self-harm and for alcohol specific conditions are both the highest of all wards in North Lincolnshire and significantly above local and national averages; admissions for alcohol specific conditions are also significantly higher than in 2016/17.
- Emergency hospital admissions for all adults in Brumby ward are the highest in North Lincolnshire and significantly above average with working age admissions having increased significantly since 2016/17.
- The proportion of over 65s in receipt of attendance allowance is significantly higher than overall for North Lincolnshire and England.
- Life expectancy at birth for both males and females is more than 3 years lower than overall for North Lincolnshire and significantly worse than England with females having the lowest expectancy in the local authority.
- The mortality rate in Brumby ward from both all causes and preventable conditions is the second highest of all wards in North Lincolnshire and significantly above average.
- Premature deaths from cancer rank the highest of all wards in the local authority and are significantly worse than the national rate along with those from respiratory disease; deaths from coronary heart disease are also above local and national average rates but not significantly.
- Between two fifths and a half of Brumby ward residents die in their usual place of residence which is similar to the overall proportion in North Lincolnshire.

Relative low-income is defined as a family whose equivalised income is below 60 per cent of contemporary median income. Gross income measure is Before Housing Costs (BHC) and includes contributions from earnings, state support and pensions. Total of figures from each ward does not match North Lincolnshire figure due to statistical disclosure controls applied by the DWP. England Figures from Fingertips, PHE.
Claimant Count	Period - Mar 2020; Rate: rate per 1,000; Numerator: Claimant Count, NOMIS Mar 2020; Denominator: Area resident population (persons, 16-64yrs) , ONS 2019; Notes: Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work, and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding. Population data for Mar 17 from is 2016 mid year population estimates.
