

# Crosby and Park Ward Profile 2021

## Part of the North Lincolnshire JSNA

These profiles aim to provide a brief picture of public health outcomes in each of North Lincolnshire's 17 electoral wards

The information contained within the profiles use the latest published data available at the time of writing.

The profiles should help us understand what factors are driving health improvement in each area. They should also help us identify where resources could be targeted to improve health and wellbeing and reduce health inequalities.

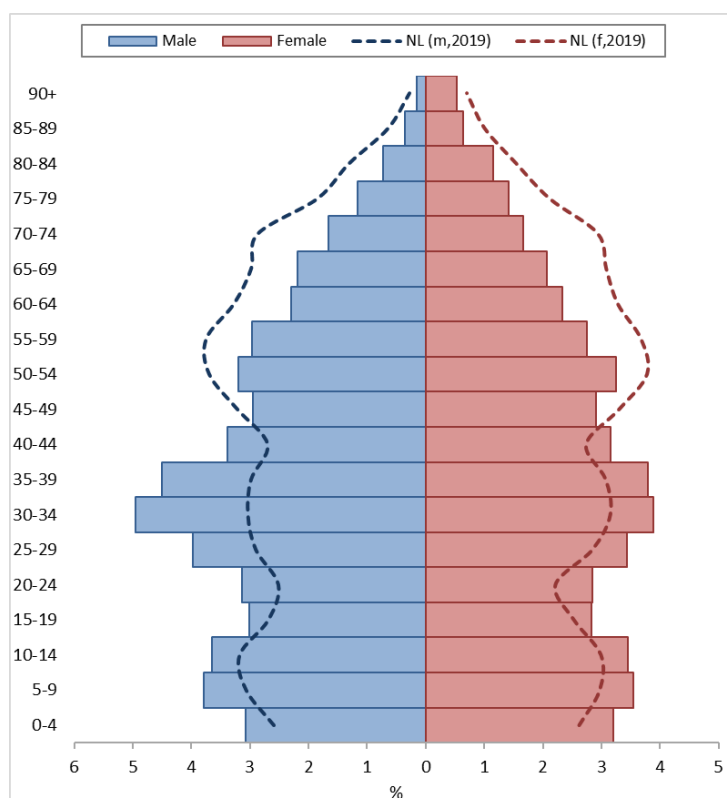

Crosby and Park ward borders Burton upon Stather and Winterton ward to the north, Broughton and Appleby ward to the east, Town to the south and Burringham and Gunness ward to the south west.

It has the largest population of any ward in North Lincolnshire with 14500 residents, equivalent to 1800 per square kilometre, of which half live in North Lincolnshire's 20% most deprived neighbourhoods.

The ward population profile shows less people aged 45-89 compared with North Lincolnshire overall and more children aged 0-14 and adults aged 20-45.

## Life expectancy at birth by ward

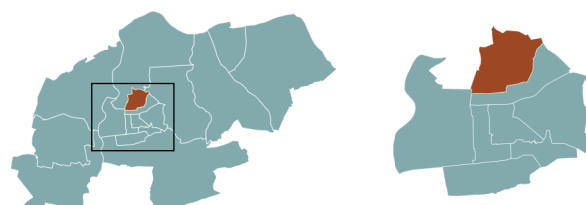

# Crosby and Park Ward 2021

## Ward Summary

- Crosby and Park ward has the largest population in North Lincolnshire with an age profile which is significantly younger than overall for North Lincolnshire and a higher than average proportion of minority ethnic children; half of the population live in neighbourhoods ranked amongst England's top 20% most deprived.
- Police recorded crime, violent crimes and anti-social behaviour are all significantly higher than for North Lincolnshire and England as a whole.
- The rate of children living in relative low income is the second highest in North Lincolnshire and significantly above average as are rates for claimant counts and elderly residents in receipt of pension credit; since 2017, the claimant count rate has significantly worsened whilst pension credits have significantly reduced.
- The fertility birth rate in the ward is very close to the North Lincolnshire average but has decreased significantly since 2016/17 whilst rates of breastfeeding initiation remain higher than overall but not significantly.
- The proportion of low birth weight babies is similar to average levels for North Lincolnshire but smoking during pregnancy is third highest in the local authority and over double the England rate with almost a quarter of pregnant smokers.
- The percentage of children reaching a good level of development at 2½ is close to the North Lincolnshire value, however, school readiness at 5 years is the lowest in North Lincolnshire and significantly worse than local and national rates; GCSE attainment in English and Maths is slightly below average.
- Over a quarter of 5 year olds have excess weight which is above the North Lincolnshire average increasing to more than a third by 11 years which is slightly less than the local average, however neither difference is significant.
- Though not statistically significant, emergency admissions for avoidable injury in children and young adults are generally below average.
- The percentage of people in receipt of Employment and Support Allowance is significantly lower than North Lincolnshire and England.
- The rate of admission episodes for alcohol specific conditions is ranked third highest in North Lincolnshire, significantly above average and significantly higher than in 2016/17.
- Adult emergency hospital admissions are significantly above the local authority average with over 65s ranked third highest of all wards in North Lincolnshire
- Emergency admissions for falls and hip fractures amongst the elderly in Crosby are ranked third highest of all wards with falls significantly worse than the local average and hip fractures significantly worse than national rates.
- Over 65s in receipt of Attendance Allowance are significantly higher than England overall.
- Male life expectancy at birth in this ward is worst overall at nearly 4½ years lower than the local authority average and female life expectancy is also amongst the worst at nearly 3 years less; both measures are significantly worse than both local and national values.
- All cause mortality is the highest in North Lincolnshire with deaths from preventable causes also ranked amongst the worst and significantly worse than average.
- Whilst admissions for coronary heart disease are similar to average rates, premature deaths from CHD are the highest of all wards and significantly above average; deaths from respiratory disease are also ranked amongst the worst in North Lincolnshire with rates nearly double the local authority value.
- Three out of five deaths in Crosby and Park are in the usual place of residence which is the highest proportion in North Lincolnshire and significantly better than average.

Relative low-income is defined as a family whose equivalised income is below 60 per cent of contemporary median income. Gross income measure is Before Housing Costs (BHC) and includes contributions from earnings, state support and pensions. Total of figures from each ward does not match North Lincolnshire figure due to statistical disclosure controls applied by the DWP. England Figures from Fingertips, PHE.
Claimant Count	Period - Mar 2020; Rate: rate per 1,000; Numerator: Claimant Count, NOMIS Mar 2020; Denominator: Area resident population (persons, 16-64yrs) , ONS 2019; Notes: Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work, and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding. Population data for Mar 17 from is 2016 mid year population estimates.
