Life expectancy at birth by ward

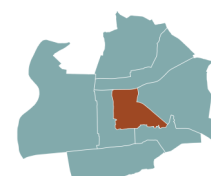

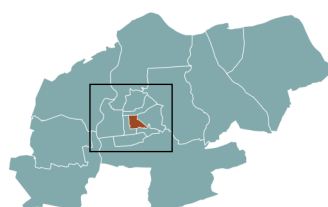

Kingsway with Lincoln Gardens Ward 2021

Ward Summary

- Kingsway with Lincoln Gardens ward has a medium sized population with a significantly higher proportion of children and young adults and less over 65s than North Lincolnshire as a whole; there is a lower than average proportion of children from a minority ethnic background.
- About one in eight (13%) people resident in the ward live in neighbourhoods ranked in England's 20% most deprived.
- Whilst the rate of children living in relative low income is significantly better than the local average, claimant counts and elderly residents in receipt of pension credit are significantly higher than average.
- Police reported crime and violent crime in the ward are significantly worse than North Lincolnshire and England averages and antisocial behaviour is also slightly above the local average, but not significantly.
- The fertility birth rate in this ward is significantly below average and the lowest in North Lincolnshire and the proportion of low birth weight babies, breastfeeding initiation and smoking during pregnancy are close to the local authority average, although with one in six pregnant women smoking, rates are significantly above national values.
- The rate of children reaching a good level of development at 2½ years is significantly lower than the local average and is one the lowest in North Lincolnshire as is GCSE attainment in English and Maths.
- A quarter of 5 year old children carry excess weight, rising to a third of 11 year olds, both of which are similar to North Lincolnshire overall.
- The rate of children with an Early Help Assessment is ranked third highest of all the wards in North Lincolnshire and the rate of children in need is also higher than average, but not significantly.
- Admissions for avoidable injury amongst children are similar average whilst overall they are amongst the lowest in North Lincolnshire, but not significantly.
- Whilst not statistically significant, hospital admissions for intentional self-harm overall and in older children and young adults are slightly above average. Admission episodes for alcohol specific conditions, however, are slightly lower than overall for North Lincolnshire and significantly lower than England.
- The proportion of over 65s in receipt of Attendance Allowance is above the local average and significantly worse than for England overall.
- Emergency hospital admissions for both working age and elderly adults are significantly above the local authority rate and those for 18-64 year olds are significantly worse than 2016/17.
- Emergency admissions for falls and hip fractures amongst the elderly are both close to average locally but falls are significantly lower than the national rate.
- Whilst female life expectancy at birth is similar to local and national average values, male life expectancy is nearly 2 years lower than that for North Lincolnshire and significantly lower than England.
- All cause mortality rates in the ward are close to the North Lincolnshire average but, although not significantly, preventable deaths are slightly above average.
- Although not significant, in contrast to low hospital admissions for coronary heart disease, premature deaths from CHD are above local and national averages; and premature deaths from cancer and respiratory disease are also slightly higher than local and national rates.
- With over half of deaths occurring in the usual place of residence, this ward has the second highest proportion in North Lincolnshire.

Total of figures from each ward does not match North Lincolnshire figure due to statistical disclosure controls applied by the DWP. England Figures from Fingertips, PHE.
Claimant Count	Period - Mar 2020; Rate: rate per 1,000; Numerator: Claimant Count, NOMIS Mar 2020; Denominator: Area resident population (persons, 16-64yrs) , ONS 2019; Notes: Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise. This experimental series counts the number of people claiming Jobseeker's Allowance plus those who claim Universal Credit and are required to seek work and be available for work, and replaces the number of people claiming Jobseeker's Allowance as the headline indicator of the number of people claiming benefits principally for the reason of being unemployed. All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding. Population data for Mar 17 from is 2016 mid year population estimates.
